

Focus ChloroPar W-40

PRODUCT DESCRIPTION

Focus ChloroPar W-40 is a chlorinated compound based on C20-28 alkanes. This product can function as an extreme pressure additive, flame retardant, and plasticizer. A small amount of stabilizer has been added to maintain product quality during transport and storage.

APPLICATIONS

Focus ChloroPar W-40 can be used in a variety of different industries including lubricants and metalworking fluids, plastics, rubbers, textiles, coatings, sealants, and adhesives.

Focus ChloroPar W-40 can improve lubrication and extreme pressure properties in metalworking fluids (such as straight oils and soluble oils). The recommended treat rate in these applications can range between 2 and 40% depending on the fluid's intended machining operation.

TYPICAL PROPERTIES

Feature	Unit	Standard Value
Appearance @ 25 °C	-	Clear yellow liquid
Chlorine content	%	42
Specific gravity @ 25 °C	-	1.17
Density @ 25 °C	lb/gal	9.75
Color, ASTM	-	1.0
Viscosity @ 100 °F	SUS	3600
Viscosity @ 210 °F	SUS	140
